DETAILED ACTION

1. Applicants election of claims 87 – 97 without traverse is acknowledged.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 87 and 88 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. patent 5,978,386 to Hamalainen et al in view of U.S. patent 6,636,505 to Wang et al.

Hamalainen et al teaches, in a PPP configuration, removing *stuffing* bytes in col 4 lines 13+ and 19+, and also flag addition means is mentioned in col 7 lines 19+; and see col 6 lines 60 – 66 (flag removal) and col lines 4+ (flag “returned”, ie, (re) insertion);

Information (flag) for identifying a frame partition is mentioned in col 7 lines 14 and 17; and see also col 3 lines 57+ (control fields); removing the octets (stuffing bytes) is mentioned above.

Hamalainen does not, however, teach a means for identifying a PPP frame in a lower layer than PPP itself.

Wang et al teaches identifying the presence of a PPP frame in a layer lower than PPP. See col 17 lines 25+, and also figure 13, esp. the Ethernet Mac area.

It would have been obvious to one of ordinary skill in the art at the time of the invention to have, in Hamalainen et al, designated the presence of a PPP frame in a layer lower than the PPP layer itself, in light of the teachings of Wang et al, in order to provide a means for rapidly

providing the communication system with information regarding the type of frames which are transmitting the data.

4. Claims 89 – 97 are allowed.
